Pre-Conference Workshop: The Common Core K-12 Curriculum—Implications for AASCU Institutions

No charge. Includes refreshments and lunch.

This all day workshop on the Common Core will focus on the consequences of adoption of the Common Core State Standards for higher education. To date, 46 states and the District of Columbia are adopting the Common Core, transforming the curriculum of the public schools, and most notably, increasing the expectations for all students. As a result, students will be coming to higher education with a different educational background, and different level of educational attainment. The new Common Core State Standards will have significant implications for admission standards and practices, for general education, for the various content fields for teacher preparation, and ultimately, for how we teach.
