

How Are States Trying to Meet Their Educational Attainment Goals?

Shannon Gilkey & Anne Phillips

Attainment Deadlines, there's still time

States with Postsecondary Attainment Goals
by Target Year

- ❖ Over 40 states have set attainment goals
- ❖ 2020 – 9 states
- ❖ 2025 – 26 states
- ❖ 2030 – 5 states.

Discussion Questions, Self Assessment

Given the close proximity of these ambitious goals' target years (eg, 2020, 2025, 2030), does the leadership at my institution:

- Understand and prioritize our institution's explicit role in meeting the state's postsecondary attainment goal?
- Set long-term recruitment, enrollment, retention and graduation targets for students in connection to that goal?

Given the increase in services my institution will need in order to meet these ambitious attainment goals, do I feel well-positioned to communicate those needs to policy-makers, donors, etc. to elicit necessary resources?
